

ecospecifier South East Asia Subscribers

Providing green building solutions

A one-stop shop for industry to deliver green buildings by...

- Connecting to a powerful online green products, materials and technologies resource of verified eco-information using life-cycle based analysis
- Assessment of green building materials solutions and green rating systems including Green Mark® and other SE Asia, rating tools such as Berde, Green Star™, NABERS, BASIX, etc
- Networking growth opportunities

"ecospecifier is our first and last stop in specifying materials as the research is done for us already"

*Gerard Reinmuth as Director, Terroir - Architects
Darling Island Workplace 6, Melbourne, Australian's 1st 6 Green Star ODv2*

Services to stay on top of innovative, green developments

Online Green Materials Resource

Access to our powerful search engine provides subscribers with a massive collection of knowledge to conduct green materials research and deliver green material choices quickly and economically. Our full materials database offers scientifically based, third party verification of eco health preferable building materials, technologies and fit-out products available in South East Asia

Education Programs

As one of the world's leading consultancies in sustainable development, we also lead in the design of training and education programs to fill the knowledge gap in green building solutions

with self directed educational courses available online to e-learning packages.

Professional Programs

Through our seminars & workshop programs, we provide incentives to subscribers to increase knowledge in the field of green building solutions.

In-house training

Programs like our Executive Directions with extensive practitioner content meet the in-house development needs, assisting companies to rapidly increase staff knowledge and skills in delivering green rated building outcomes and improving aspects of sustainability delivery.

Subscriber Directory

The **ecospecifier** ethos is all about keeping natural systems open, integrated and healthy and this includes our relationship with you. We manage networks that enable you to leverage your expertise by accessing our global industry network via our Subscriber Directory and Project Showcasing, through our presence at conferences, expos and other green focused events that we conduct, co-convene or promote with our Industry every year.

Publications

We are a research organisation and offer subscribers publications, ranging from papers, powerpoint presentations to specialist books authored by our technical team.

Providing green building solutions

Enabling the industry to make green building choices with confidence

The built environment industry subscribes to our services to achieve Green Mark® and other green rating systems to provide exemplary projects sustainably designed and specified. More than 10 000 users, employ our eco-resource system daily.

From industry to tertiary institutions, from Government departments to the home renovator and builder, **ecospecifier** has become a 'one-stop' support system to make informed and rapid decision in the quest to reduce environmental impacts and create healthier built environments for people to live, work and play.

"**ecospecifier** is a world-class tool that deserves global input and attention. No other software tool helps designers and specifiers make decisions on products in such scientifically, environmentally based protocol. I am impressed and sincerely anxious about seeing **ecospecifier** gain the global recognition it deserves... We need **ecospecifier** out here in the building industry."

Dr Kath Williams, Fulbright Senior Specialists,
Past Chair, US Green Building Council

"**ecospecifier** has paved the way by providing the only real database who can deliver in accordance with local and international green standards".

Bovis Lend Lease
